INTRODUCTION

Over the many years, the processing tomato crop has been an important cash crop on many farms located mainly in those counties of Ontario that border on the northern shores of lakes Erie and Ontario.

The statistics on processing tomato production by county in this report were obtained through the cooperation of the office of the Ontario Vegetable Growers' Marketing Board. The author is responsible for the preparation and presentation of the information in this report.

These statistics will provide information on trends in processing tomato production in Ontario and tomato producing states in the United States, tomato consumption and importation of tomato products into Canada for those who are interested in the production and utilization of this important crop in Ontario.
